Risk
Removed.
On Every Jobsite.
DISTRIBUTION CENTERS AB | BC | FL | ON | QC | TX | WA
Axiom

Why Axiom?

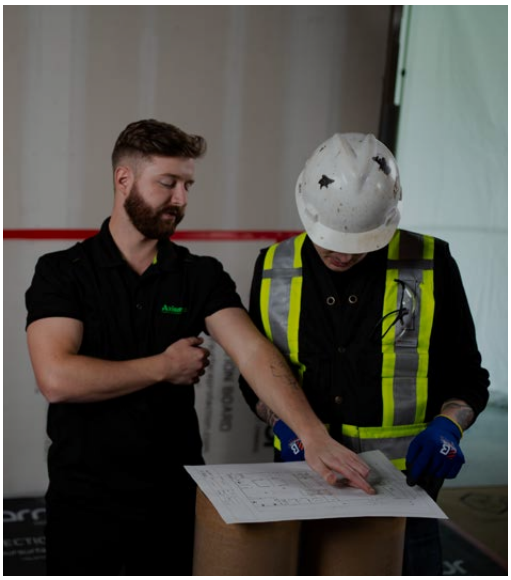

We supply high-performance temporary surface protection solutions direct to construction professionals across North America, enabling you to remove the risk of damage deficiencies on jobsites.

Construction is complex with countless moving parts, and damage to finished surfaces kills time, increases costs, and puts your reputation on the line. We exist to help you remove that risk.

We lead the industry by stocking one of the widest ranges of temporary surface protection solutions across our 7 strategically located Distribution Centers, ensuring you get what you need, when, and where you need it. We're a trusted brand nationwide, with an expert team who understand real jobsite pressures.

That's the Risk Removed methodology - enabling you to save time, save money, and look good on every jobsite.

3 Pillars Of Risk Removed.

Save Time

Spend less time wrestling with makeshift materials. Purpose-designed protection installs faster, removes easier, and cuts down on post-construction cleanup time - freeing up hours that can be spent moving the project forward. With fewer damage deficiencies and no schedule-wrecking delays, the entire jobsite flows smoother, saving time at every stage.

Save Money

Cut labor costs at every stage - faster installs, easier removals, and less post-construction cleanup all add up to big savings. With protection as a known, budgeted investment, you avoid the unpredictable costs of damage deficiencies and schedule overruns. That means fewer financial surprises and more control over your project budget from start to finish.

Look Good

A well-protected site makes the whole construction team look good - in the eyes of clients, subtrades, and everyone who steps on site. Clean, damage-free surfaces enhance your reputation for quality and professionalism. And when protection is custom-branded, it does double duty by showcasing your company's name and reinforcing your brand on every project.

Every Square Foot You Protect Saves An Average Of $6 In Damage, And Cuts Cleanup Time By 48%.

The Axiom Difference

Axiom isn't just another supplier in the industry - we set the standard. We lead by doing things differently: investing deeper in inventory, moving faster than the market, and backing every order with real jobsite experience. Everything we do is designed to remove risk for construction professionals, and that's why the best builders don't just buy from Axiom - they rely on us.

ASK Axiom Support

Advice. Support. Knowledge. Need a proposal? A site visit? A quick call or text? Or a Lunch + Learn session? We support your project from start to finish.

Branded Protection

Many of our products can be custom branded with your logo when minimum order quantities are met, adding a layer of professionalism to your jobsite.

Extreme Customer Service

Our team supports you before, during, and after every order, working the way you want to: video call, phone, text, email, or on-site. Fast answers and real people.

Every Surface Covered

Temporary surface protection is all we do, and with 11 product categories and an unmatched in-stock range, nobody does it better. We have a solution for every surface and it's ready to ship.

Innovation In Action

From idea to in-stock product, we're constantly launching innovations that solve real problems on real jobsites. We take pain points and turn them into smart, practical solutions.

Rapid Jobsite Delivery

Get what you need, fast. With 7 Distribution Centers and over 11 million sq.ft. of floor protection in stock, we deliver direct to your jobsite where and when you need it.

Smart + Sustainable

Sustainability doesn't have to be complicated. Our Smart + Sustainable approach makes it easy to choose better - whether it's Re-Cycled or Re-Usable solutions you're looking for.

Try Before You Buy

Our industry-first Axiom Sample Box program, makes it easy to review before you commit. Request samples and they'll show up direct to your jobsite, office, or wherever you need them.

Team Axiom

We are aligned around a culture of accountability, innovation, and extreme customer service - a culture that's hard to duplicate and impossible to imitate.

From sales and operations to customer support, each team member is committed to understanding your project, anticipating your needs, and removing risk at every step. This shared mindset is what drives faster responses, smoother deliveries, and the kind of reliability that keeps your jobsites moving.

High-Performance Brands

At Axiom, we're proud to bring the industry's best temporary surface protection solutions to market including our own exclusive brands: Armour Surface Protection™ and Bulldog Board™.

armour™
DEFEND AGAINST DAMAGE.

We actively look for problems in the construction industry to provide innovative solutions in the form of temporary surface protection products. All of our products are designed with the end user in mind. If it's not high quality, doesn't help make your job easier, or isn't worth the cost, then it's not Armour™. That's the high standard we live by.

www.armoursurfaceprotection.com

BULLDOG™ BOARD
BY armour

Bulldog Board™ has a reputation in the industry as a high-quality temporary floor protection solution that defends against damage. Bulldog Board™ comes standard with many features packed into it, all of which is wrapped up with exceptional value in an easy solution to keep your floors protected from damage.

News + Blogs

Our News & Blogs section is where Axiom's knowledge, experience, and industry insights come together.

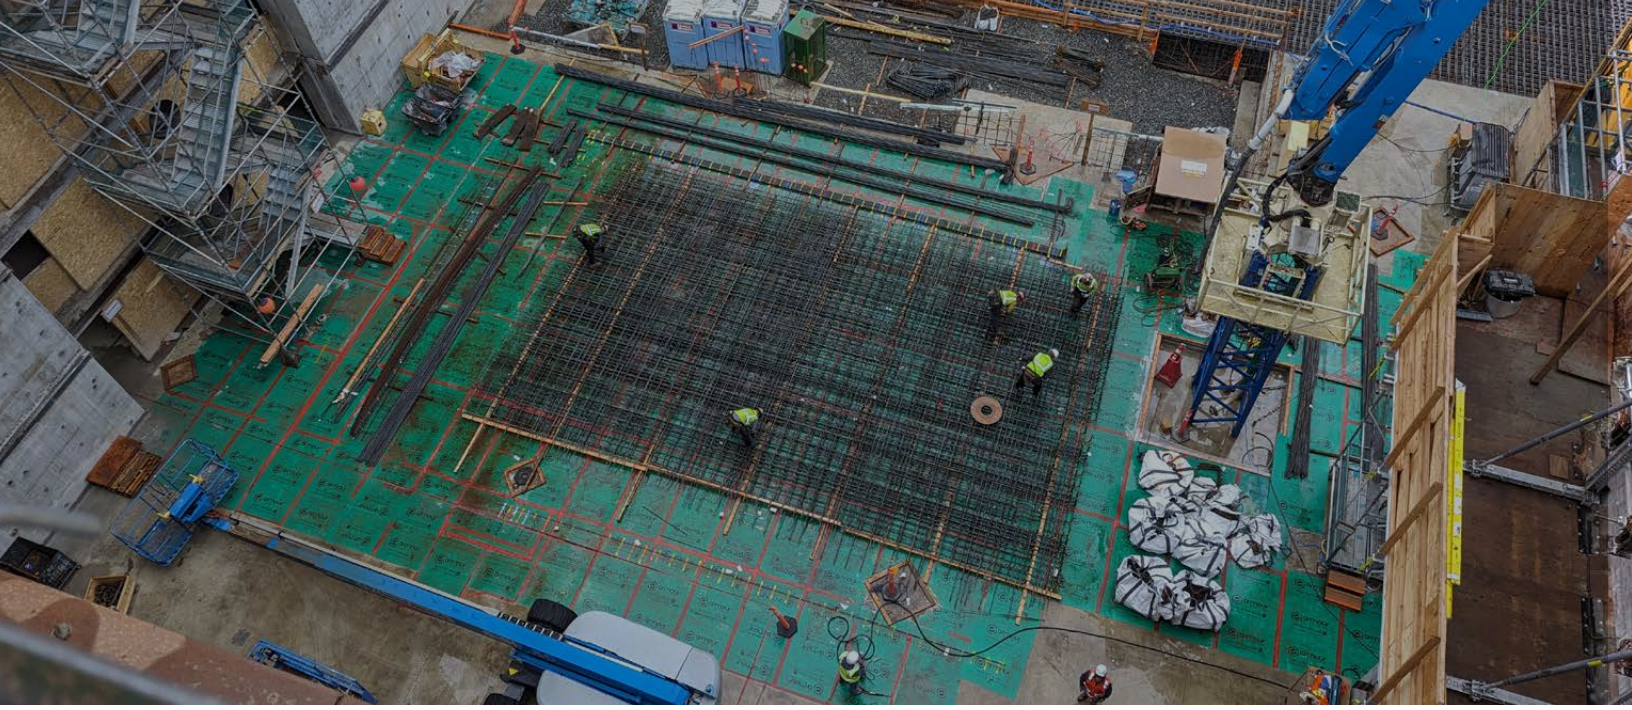

It's a growing library of quick, easy-to-read articles designed to help you stay informed and inspired. From real project stories and product spotlights to installation tips, new innovations, and industry trends, it's where our team shares the lessons, ideas, and solutions we've learned from jobsites across North America - so you can put them to work on yours.

Case Studies + Reviews

Our Case Studies & Reviews showcase real feedback from construction professionals who've tried and tested Axiom products on their own projects.

These stories highlight what worked, how challenges were solved, and the results achieved - straight from the field. You'll find them featured throughout our catalog and on our website. Whatever you're looking to protect, chances are you're not the first - we've probably encountered it before.

Multi-Family Construction

From low-rise apartments to high-rise condo towers, Axiom products are trusted on multi-family projects of every scale.

These environments demand protection solutions that perform under constant traffic and tight timelines. Whether it's a modular build, assisted living facility, or townhouse development, our products help you safeguard finishes, control costs, and keep jobsites looking professional from the first unit to the final turnover.

Commercial Construction

Axiom products protect surfaces across some of the most demanding commercial environments - from hospitals and hotels to schools, arenas, and office towers.

Every commercial project has its own challenges, but the goal is always the same: deliver a clean, damage-free result on schedule. Our protection systems help reduce rework, save time on cleanup, and maintain a professional site appearance across every phase of construction.

Contract Flooring

When floor protection is included in the scope of the flooring contractor, Axiom offers a full range of solutions to fit your workflow and project needs.

We partner with flooring professionals across North America to protect installations of LVT, carpet tile, rubber, epoxy, tile, hardwood, and more. Our solutions prevent scratches, spills, and impact damage during and after installation - keeping every finished floor looking flawless right through to handover.

The protection board we ordered was exactly what we needed. Less than half the cost of plywood that we had planned on using, and the guys can lift ten sheets at a time by themselves instead of two guys moving one sheet at a time. We were planning on having 6mil poly underneath the sheets, but since these are already waterproof, there's no need.

FARMER

Armour Protection Board – Green HD

Armour Protection Board – Green HD is a heavy-duty temporary surface protection solution engineered for extreme durability, making it a dependable alternative to plywood or hardboard for demanding jobsite conditions.

- Made from high-density 5mm thick plastic sheet with a honeycomb core and fleece backing for added non-abrasive protection
- Handles extreme impacts while preventing scratches and scuffs on finished surfaces
- Slip-resistant surface enhances safety, while UV resistance makes it suitable for exterior applications
- Lightweight, waterproof, reusable, and simple to cut, install, and seam together
- Commonly used to protect floors in high-traffic areas for long durations against lifts, carts, and other heavy-duty jobsite traffic from major construction damage like high impacts in high-traffic areas or long-term projects

SCAN TO LEARN MORE ABOUT THIS PRODUCT

Axiom have provided me with surface protection products on two projects to date, and have been excellent in both their customer service and delivery times. My main focus was to find products that were durable, which in turn would save projects money by not having to regularly replace damaged protection. In Axiom, I found both the products, and the durability required.

These protectors are AWESOME!! I can't believe how well they have held up to daily construction site usage, even after constant abuse for the past three weeks or so. I'll be honest, my Superintendent was a little skeptical when I told him the total cost, but these have performed as good or better than anything we've tried that is multiple times more expensive.

There are two things that standout about Axiom. 1, the quality of products, and 2, the customer service and prompt lead times. Our overall experience with Axiom has been great, which makes life on site very manageable knowing Axiom can deliver with a high level of reliability. All of Axiom's products have served our needs thoroughly; from floor protection to protection of elevators, glass, electronics, and for creating finish-safe work areas on the final-installed products. The Installation Tools have also drastically sped up the install time, while reducing demanding labour.

PARAGON LIVING

Armour Protection Board – Green HD

Armour Protection Board – Green HD is a heavy-duty temporary surface protection solution engineered for extreme durability, making it a dependable alternative to plywood or hardboard for demanding jobsite conditions.

- Made from high-density 5mm thick plastic sheet with a honeycomb core and fleece backing for added non-abrasive protection
- Handles extreme impacts while preventing scratches and scuffs on finished surfaces
- Slip-resistant surface enhances safety, while UV resistance makes it suitable for exterior applications
- Lightweight, waterproof, reusable, and simple to cut, install, and seam together
- Commonly used to protect floors in high-traffic areas for long durations against lifts, carts, and other heavy-duty jobsite traffic from major construction damage like high impacts in high-traffic areas or long-term projects

SCAN TO LEARN MORE ABOUT THIS PRODUCT

After using this material on multiple projects to protect a variety of surfaces from ceramic tile to carpet tile I have not found another product that offers the versatility and quality of protection that Axiom Fleece provides. The ease of installation and removal is also a huge advantage and saves time and money on every project I have completed. To add to this the waterproof protection is second to none and I have yet to have a issue with paint etc. seeping through to the finished floor beneath. All around great product at a reasonable price.

bird

Armour Grip-Terra Mat

Armour Grip-Terra Mat delivers a durable first line of protection, capturing dirt, mud, and debris from boots, creating safe and visible walkways across challenging site conditions while standing up to the demands of high-traffic and long-term use.

- Constructed from 1/2in thick heavy-duty permeable rubber material
- Allows water and dirt to pass through while providing excellent grip in all conditions
- Bright orange color enhances visibility, improving site safety and awareness
- Durable, easy to clean, and highly reusable for ongoing use on multiple projects
- Commonly used on jobsite pathways to stop dirt and debris from being tracked inside, keeping interiors clean during high-traffic and long-term projects

Armour Poly Sheeting Roll – Heavy (Clear)

The Armour Poly Sheeting Roll - Heavy (Clear) is a versatile solution for temporary protection on construction projects, offering reliable coverage for dust control, overspray, and hoarding applications.

- 2.1 mil thick poly sheeting provides durable and lightweight protection
- Easy to cut, drape, and secure for quick setup on jobsites
- Clear material allows visibility while maintaining barrier integrity for safe work environments
- Ideal for use in a variety of temporary protection applications, including painting, renovations, and general dust control
- Commonly used to create dust barrier areas, protecting from moderate construction damage like scuffs, scratches, or dust transfer in medium-traffic projects

SKU: AXAPH1000 **SIZE:** 10ft X 100ft (1000 sq.ft.)

SCAN TO LEARN MORE ABOUT THIS PRODUCT

We recently used Axiom for a large interior renovation of a fully occupied and active public building. Their products had us covered from floor to ceiling, and we never ran into any safety issues even in high traffic areas. New surfaces and finishes remained well protected until handover and the site team found the ease of application top notch. I'm certain this will not be the last time we get Axiom on board for our surface protection needs.

POMERLEAU

Poly Sheeting Roll – Reinforced (White)

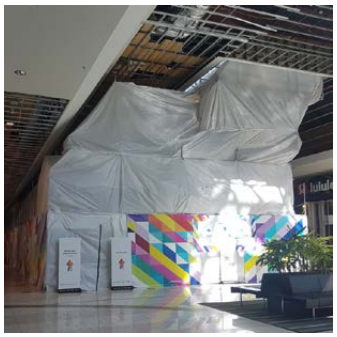

The Poly Sheeting Roll - Reinforced (White) provides durable, long-lasting protection for construction projects, offering reliable coverage for temporary hoarding, dust control, and structure enclosures.

- Reinforced poly sheeting offers increased tear resistance and durability
- Ideal for heavy-duty applications including restoration, abatement, and long-term construction projects
- Easy to cut, drape, and secure for efficient setup on jobsites
- Flexible and lightweight for convenient handling while maintaining strong barrier protection
- Commonly used to create dust barrier areas, protecting from moderate to major construction damage like repeated impacts, heavy wear, or sustained activity in busy or long-term projects

SKU: AXRPE20100-W **SIZE:** 20ft X 100ft (2000 sq.ft.)

Installation Tools

Armour Floor Tape Dispenser

The Armour Floor Tape Dispenser provides an efficient, ergonomic solution for applying seam tape on temporary floor protection, making installation faster, easier, and more effective while reducing strain on workers during large projects.

- Constructed from durable steel and rubber components for long-lasting performance
- Increases seam effectiveness by applying consistent pressure from the roller
- Universal design fits any tape roll up to 4.5in wide with a standard core
- Speeds up installation and reduces risk of back injury from bending
- Commonly used for effective tape installation for moderate to major construction, or sustained activity in busy or long-term projects

SKU: AXAFTD **SIZE:** up to 4.5in
